ZAWN ASSEMBLY GUIDE

© CONTOUR CAMPERVAN FURNITURE LTD

BEFORE YOU START

- Find a clean level surface to assemble the unit on
- Check the torque setting on your drill/driver. Too much torque could drive the pocket screws through the other side!
- Clamp or ask a friend to help hold the parts together whilst screwing them together.
- Sand all faces and edges before assembly for best results.
- All parts should slot snugly together, without any gaps.
- Wood can swell/expand in different temperatures and humidities. If the joints are too tight, sand the faces slightly and try again.
